

Minutes – Supervisor Meeting 16 – 16/03/2015

Summary

At this meeting I updated Keith on my progress with the implementation which was mainly focussed on deleting cookbooks and recipes from the app as well as starting to write the search code. I discussed waiting on a change to the database to possibly implement SQL scheduled jobs to delete marked “deleted” rows from the database. I also discussed my challenge trying to implement the searchview feature in the GUI. At the meeting I outlined my plan to finish my implementation by the 30th April just using that week to place final touches on the app. My aims for next week is to finish the basic search functionality and have a comment box feature working in the app.

Next Meeting

23/03/2015 – 2pm
