

**User Testing Session**  
**Appendix 8.3.2**  
**Recipes For Life**  
**9/3/2015**  
**3 participants**

**Participant 1 in session (participant 5 overall):**

Create an account:

- Had challenges using the keyboard
- Didn't understand that hints were just suggestions and not actual defaults
- Wasn't sure what cooking interest meant

Homepage/My Cookbooks:

- Instinctively went to the menu bar

Add A Cookbook:

- Recognised the user could type in browse box – remove ability to type in the browse box and place hint instead.

Contributors:

- Fine
- A nice idea

Add A Recipe

- Description box could be larger
- Amount was ok but might prefer to add word too
- Would like an “other” option in units for flexibility
- Struggled to understand what the spinner for time was for – needed to be made clearer.

View Recipe:

- Make image bigger
- If photos are taken from camera they appear the wrong way round
- Liked the page it was simple
- Said the screen stop sleep button was a winner
- Found the share and full screen button fine
- Would prefer capital a and lowercase a to represent font change.

Edit recipe:

- Fine
- Just looked for add/remove features in preparation which was not done yet.
- Might be good to have a comment box to add small changes when you don't want to edit it.

I recognised buttons were appearing on cookbooks when the person wasn't the creator which shouldn't have happened.

Wasn't sure about the background on the sign up page.

**Participant 2 in session (participant 4 overall):**

Create an account:

- Again was confused by the hints
- The cursor highlight wasn't clear to participant which was confusing
- Struggled with devices keyboard

Add a cookbook:

- Sideways images were confusing again

Contributors:

- Fine

Add a recipe:

- Again would like flexibility on amount
- Didn't know the spinner spinned.
- Stop the spinner being editable

View:

- Nice idea to increase the font but wasn't sure about the icons. Capital and lowercase a would be better.

Edit:

- Clear

General comments were I think it's a simple app which you can use to share with other people.

**Participant 3 in session (Participant 6 overall):**

Create an account:

- Confused by hints
- Cursor highlight an issue
- Forgot password might be useful

Homepage:

- Looked at menu first

Add a cookbook:

- Fine
- Close would be a useful button to have. Didn't know tapping would get rid of dialogs.

Generally looks at menu a lot instead of icons at the top.

View recipes:

- Zoom image by pinch might be good.
- Fine
- Full screen and increase font nice.
- Icons would be fine if knowledgeable about tech.

Edit recipe:

- Fine

General feedback:

- Seems useful
